SOCIETY

WASHINGTON SOCIETY

WASHINGTON, D. C., June 28.—Plans have been completed for the marriage of Miss Eleanor Crozier Reburn, daughter of Mrs. John E. Reburn of this city and the late Mayor Reburn of Philadelphia, and Lieut. Francis Clark Harrington, Corps of Engineers, U. S. A., Wednesday, June 30. The ceremony will take place at Pequot Chapel, New London, Conn., at 1 o'clock, and will be followed by a reception at Oak Lodge, the Reburn summer home. Former Representative William S. Reburn will give his sister away and Mrs. W. S. Reburn will be her matron of honor. The bridesmaids will be Miss Katharine McClintock, Miss Adelaide Heath, Miss Julia Whiting, Miss Caroline Ogden Jones, Miss Rebecca Wilmer, Miss Eleanor Morgan, all of Washington, and Miss Victoria Baker of Bristol, Va. The ushers will include Lieut. E. St. John Greble, Jr.; Lieut. Morse, Lieut. Kollock, Lieut. Bradford, Lieut. Philip Matthews, Capt. Alexander and Capt. James Walsh.

The marriage of Miss Anne Seymour Jones, daughter of Representative and Mrs. William A. Jones, and Lieut. S. Roland Hopkins, U. S. A., will take place this evening in St. John's Church, Warsaw, Va., at 8 o'clock.

The wedding is of great interest here, and a number of guests from Washington and other cities have assembled in Warsaw for the occasion. Representative and Mrs. Jones are entertaining a large house party which includes the relatives and wedding party.

Miss Jones' attendants will include Miss Mary Madison Jones of Brooklyn as maid of honor and the following bridesmaids: Miss Frances Effinger, Miss Helen McCumber, Miss Antoinette Ray, Miss Dorothy Taylor, Miss Mary Archer Glass, daughter of Representative and Mrs. Carter Glass of Virginia, and Miss Hattie Mitchell of Warsaw.

A large reception will follow at the home of the bride's parents.

An interesting wedding took place today at noon at St. Stephen's Episcopal Church, when Miss Maud Williamson and Maj. Parker W. West, U. S. A., retired, deputy governor of Soldiers' Home, were married in the presence of a small gathering of relatives and intimate friends. The ceremony was performed by the rector, the Rev. George Fiske Dudley, and the bride, who was given away by her brother-in-law, Mr. Harry Ostermayer, wore a becoming suit of dark blue serge with hat to match and a corsage bouquet of orchids and lilies of the valley.

Mrs. and Mrs. West left immediately after the ceremony for a trip to the Pacific coast. They will be at home after July 15 at Soldiers' Home.

Maj. Gen. and Mrs. George Barnett were the hosts at a delightful garden party given yesterday afternoon in honor of Rear Admiral and Mrs. W. S. Benson.

The Marine Band played for the dancing, which took place in the two marquees erected for the occasion on the lawn, and the tea tables were placed around under the trees.

Mrs. Barnett received in a gown of white lace, with a pink garden hat. Those assisting were Mrs. Josephus Daniels, Mrs. Edward Eberle, Mrs. Charles McCawley, Mrs. Charles A. Doyen, Mrs. William F. Bevan and Mrs. Benjamin Reeves Russell. A number of young girls and some of the officers of the corps also assisted.

Mrs. Z. W. Reynolds, wife of Pay Inspector Reynolds, U. S. N.; her two daughters and Mrs. W. D. Hoover and her son and daughter left Sunday to spend the summer in California. (Special Star-Bulletin Correspondence)

Following her trip to the Pacific coast and incidental visit to the pan-American exposition, Mrs. Edwin C. Swift is now spending several weeks at the residence of her daughter, Mrs. A. C. P. Wichfeld (Mrs. Clarence Moore), looking after the welfare of her grandchildren. In late June Mrs. Swift, the Wichfelds, who are honeymooning in California, and Mrs. Wichfeld's children will go to Prides Crossing for the summer.

Miss Margaret Wilson was motoring yesterday afternoon on Connecticut avenue. She wore a white cloth motor coat over a simple white gown, with a large, broad-rimmed white hat.

LURLINE ARRIVAL

AVERTS VERY

'NEAR PANIC'

There are times—or periods of time—which people have elected to call "psychological."

To wit, example: For the past several days a large number of people of this community have been on their toes—figuratively speaking, of course—and this morning—just about the time the Matson liner Lurline slipped into her berth, so great had the tension become, they were about as desperate as peaceful Honolulu's can become—then—Ah! that's the psychological part of it—the arrival of the good ship Lurline, for she brought that so ardently desired shipment of Orange Blossom candy for the Honolulu Drug Company and averted that impending "near panic" occasioned by the "famine" of the

PLENTIFUL SUPPLY OF POTASH TO BE HAD FROM OCEAN WEEDS

World Need Not Be Dependent on German Deposits; Hawaii May Export Product

That the supply of potash is necessary to the output from Germany, is not the benefit of U. S. West, but the benefit of the federal agricultural experiment station in Honolulu. Mr. Westgate, in conjunction with the station chemist, W. T. McGeorge, has worked out statistics showing that an enormous amount of potash is available from the sea weed of the Pacific coast.

A large amount could also be manufactured from the kelp found along the coasts of all of the Hawaiian islands, with the exception of Oahu. The local supply is so plentiful that if the industry were ever developed here Hawaii should produce all the potash used locally and have a substantial surplus annually for export.

In speaking of the supply of potash and the general demand for it Mr. Westgate said:

Not only has the war in Europe shut off the largest source of supply for potash as a commercial product, but the feeling has been growing for several years in the United States, that a sound economic policy demanded that our own local sources of potash fertilizer be developed to the greatest possible extent. The ordinary potash deposits are so soluble that the leaching action of the rain has, during the past geological ages, almost washed away such deposits as have been laid down in the bottoms of inland seas.

"It so happens in Germany, however, that the kanite or potash beds were fortunately protected by a heavy layer of material that is practically impervious to water and which prevents the solution and destruction of the potash beds.

"The war of course has shut off the supply and made it even more necessary than formerly that other sources be developed. The United States has made a rather exhaustive investigation of three possible sources within its own borders. The felspar rocks which exist in limitless quantities contain a fair amount of potash, but the process of extraction is as yet too expensive to make it practicable. If, however, the by-products, that is, silica and aluminum, can be utilized to sufficient advantage the plan is feasible.

"A second source of potash is in the old beds of the inland seas which formerly existed in the western third of the United States, from Utah south. The lack of rainfall which has been prevalent there for several thousand years has caused the drying up of the water. When a certain portion of the water is evaporated it can no longer

hold potash salts in solution and they are crystallized in a layer at the bottom of the lake bed. A number of these deposits have been located, but unfortunately they are either limited in extent or too far from railway facilities to be of advantage.

"The third, and what seems to be the most feasible source, is in the giant kelp or bladder sea weed of the Pacific waters. These weeds can be gathered and applied to the fields immediately adjacent to the source of supply but for a larger output a somewhat expensive undertaking is necessary. This consists in the harvesting of the sea weed crops by seagoing mowing machines. Already these machines have been devised, and are in working order along the California coast. The kelp grows several feet below the surface of the sea. Along the California coast two crops per year are obtainable, but farther north only one crop as far has been secured annually.

According to the belief of the men at the Honolulu experiment station it is only a question of time, and the surmounting of certain minor obstacles in the process of harvesting, until the United States by this new industry will be free from the domination of the German syndicate which now regulates the potash output. American farmers in a few years at least will have a domestic source of their own. This, together with the fact that we have already unlimited supplies of natural phosphates, and factories at Niagara Falls for taking the nitrogen out of the air, should make the people of America free from dependence on outside supplies for fertilizers.

TO WOMEN WHO OVERDO

Thousands of American women in our homes are daily sacrificing their lives to duty. In order to keep the home neat and attractive the children well dressed and tidy, women overdo. Soon a weakness or displacement is brought on and they suffer in silence, drifting along from bad to worse. For 40 years Lydia E. Pinkham's Vegetable Compound has proved a boon and a blessing to women in this condition, by restoring their systems to a normal healthy condition. Why don't you try it?—Adv.

INSURANCE MAN COMES.

Preparatory to moving to Honolulu with his wife and family, Harry W. Lobb has disposed of his 10-acre orchard just north of the city limits to Andrew Ingell of Porterville.

Mr. and Mrs. Lobb and daughter will leave Wednesday for the islands, where Mr. Lobb is to be in charge of insurance interests of the Pacific Indemnity Company, for which he has been Valley district agent for the past several years.

One contributing reason for Mr. Lobb's decision to leave for the islands is in the hope that the change of climate may be of benefit to Mrs. Lobb, who has been in poor health for the past several months.

The consideration for the Lobb property was given at \$12,000. The new owner will take possession at once. Porterville, Cal., Messenger.

A dispatch from Rome declares that the statement that the Pope will issue a "White Book" is untrue.

A SKIN OF BEAUTY IS A JOY FOREVER

Dr. T. FELIX GOURAUD'S Oriental Cream

OR MAGICAL BEAUTIFIER

Removes Tan, Pimples, Freckles, Moth Patches, Black and White Discolorations, and every blemish on the face, and makes the skin soft, smooth and delicate. It has stood the test of 40 years, and is so famous, we have it to be sure it is properly made. Accept no counterfeit of similar name. Dr. T. & F. Gouraud said to a lady of the harem (a patient): "As you ladies will use them, I recommend Gouraud's Cream." As the most harmful of all the skin preparations! At Druggists and Department stores.
